

Electro- Hydraulics training System

Electro-Pneumatics training System

Advanced Instrument Set

PID Control System

# GREEN ENERGY

Solar Robot

One Axis Sun tracking System

Standing solar training System

Portable Power Case System

# Qeshm<sup>®</sup> Voltage

**QESHM VOLTAGE** is the founder of knowledge localization for training & educational technology in the fields of industrial automation, robotics, mechatronics, instruments, hydraulics & pneumatics, solar energy, etc. in Iran.

3 DoF Delta Robot

**Qeshmvoltage** equipment manufacture for global work skills competitions.

Convertible to an industrial automation system and instrument training sets in real industrial conditions.

# ROBOTICS

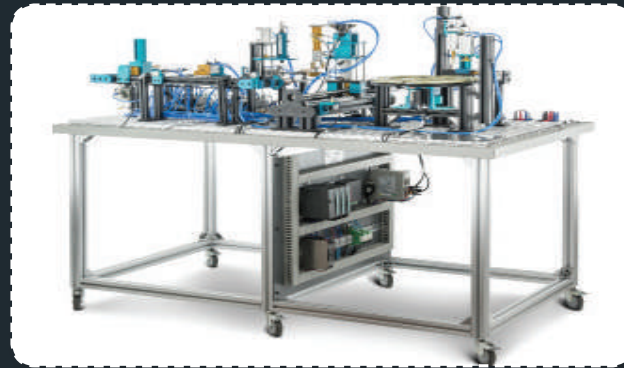

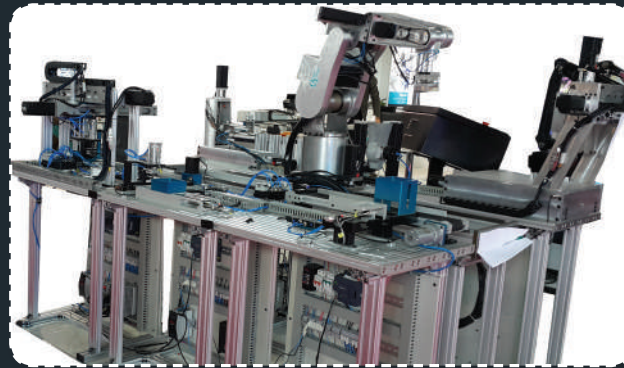

Designing, Programing and manufacturing Industrial & Training Robots

QV robots are designed for training, research & industrial Applications. They are mainly Cartesian, delta, palletizer & scara robots with different purpose perspectives & wide range of technical capabilities. Also there are many other robots such as mobile robot, drone, solar, path finder, etc.

# MECHATRONICS

Mechatronics training sets are applicable in technical universities and global competitions.

## MECHATRONIC

Real training of a factory automation

To improve automation skills, to train university & vocational center students, to train research center employees, to train factory & power station technical staff; it's us you can trust!
